

Himalay Singh

UX/UI & Product Designer

designerhimalay@gmail.com · +9191372 59354 · linkedin.com/in/designer-himalay-464488348 · uxhimalay.pages.dev · Pune, India (IST, UTC+5:30) · Open to: full-time, contract and consulting roles, remote or on site · Relocation: US, Europe, UAE

SUMMARY

UX/UI and product designer with almost 6 years in design and nearly 4 in UX and product. I take products from user research and information architecture through UI to the shipped build, for 50+ clients so far, including Stanford University and the World Bank Group. Designer by profile, engineer by practice: I build with AI agents in loops and harnesses of tests, evals and guardrails, not by vibe coding, so the hand-off is a working product.

EXPERIENCE

User Interface Designer

Jun 2024 – Present · Pune, India

Anon Consultants (a venture of SOrigin Solutions)

- Designed **47 screens across 10 flows in a fixed 4-week window** for TokoSmart, a World Bank Group research app (via Xopolis), in Bahasa Indonesia and English; launched to **around 400 participants** in Indonesia.
- Redesigned Stanford University's Our Voice Discovery Tool in 2025: the **mobile app plus the admin and super-admin systems** for a global research programme (in development, under NDA).
- Designed and coded PCG Capital's website end to end: **12 pages on Astro, React and Tailwind**, deployed on Cloudflare, with every lead routed through one checked pipeline. **Live.**
- Designed an advertising dashboard with campaign summaries, performance graphs, alerts and quick-access widgets, giving users **one overview of every campaign**.

User Experience Designer

Jan 2024 – Jun 2024 · Dubai, UAE

Tekitat Healthcare Services

- For client One Point Healthcare, structured a complete **patient, doctor and hospital portal** to meet **Dubai Health Authority (DHA) approval** requirements, for a digital healthcare programme launching in the UAE.
- Designed accessible healthcare app and web interfaces, from wireframes to prototypes, focused on **easing patient and provider interactions**.

UI Designer

Dec 2022 – Dec 2023 · Mumbai, India

Inspeero Technologies

- Designed iTAP, an OTT and gaming app, from the persona to the rewards wallet; it shipped on Google Play and the App Store and passed **500,000 downloads**.
- Redesigned the wireframes, user flows and prototypes for a new mobile app feature, **cutting task completion time by 20%**.
- Redesigned the **onboarding experience** for the company's flagship product.
- Worked across CRMs and web applications, including BlackSoil Finance, to simplify data handling, and took designs through to release with developers and product managers.

Graphic User Interface Designer

Nov 2020 – Apr 2022 · Mumbai, India

Freelance

- Designed and delivered custom promotional collateral, including engaging **event brochures and pamphlets**, to elevate brand visibility and audience engagement.
- Conceptualised and formatted bespoke **menu cards for hotels and restaurants**, aligning the layouts with each brand's identity and guest experience.
- Created large-scale **outdoor branding, banners and hoardings** for real estate and construction companies, to maximise foot traffic and project awareness.

OTHER CLIENTS

Canvia (post-purchase app for a digital art canvas), Libra Infra (solar installation and e-commerce system), Xopolis (AI agent builder), Infer360 (website upgrade).
